Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Status

Claims 23-49 are pending.

Claims 1-22 have been canceled.

Response to Arguments

The Applicant's arguments entered on October 1, 2004 have been fully considered. The amended claims are rejected in view of the newly discovered reference to Rosen (US Patent 6,047,067). See following rejection

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 23,33,43 and 49 are rejected under 35 U.S.C. 103(a) as being unpatentable over Moreau (US Patent No 5,590,196) in view of Shore et al. (US Patent 6,564,193) and further in view of Rosen (US Patent 6,047,067).

As per claim 23,

Moreau ('196) discloses a retail data processing system comprising:

a first retail data processing device for carrying out a retail transaction, and arranged to process retail data and to communicate with other data processing devices in a first data format;(Figure 1)

a first software entity, residing within the first retail data processing device and configured to receive, from the first retail data processing device, retail data relating to a retail transaction with a customer carried out using the first retail data processing device;(Figure 1)

wherein the translation of the data and related information is predicated on a knowledge of characteristics and a mode of operation of the first transaction device.(Figure 1)

Moreau ('196) does not explicitly disclose translate the received retail data into a second data format, different to the first data format, thereby enabling the first retail data processing device to communicate the retail data intelligibly to said one of the second software entity

Art Unit: 3621

and the remote server. Shore et al. ('193) discloses translate the received retail data into a second data format, different to the first data format, thereby enabling the first retail data processing device to communicate the retail data intelligibly to said one of the second software entity and the remote server (Column 3, lines 5-8). It would be obvious to one having ordinary skill in the art at the time the invention was made to combine the Moreau ('196) method with the Shore et al. ('193) method in order to enable the transaction to be processed.

Moreau ('196) does not explicitly disclose whether or not to communicate the retail data to one of a second software entity residing with a second retail data processing device and a remote server; Rosen ('067) discloses whether or not to communicate the retail data to one of a second software entity residing with a second retail data processing device and a remote server (Figure 2 and 6E). It would be obvious to one having ordinary skill in the art at the time the invention was made to combine the Moreau ('196) method with the Rosen ('067) method in order to enable the transaction to be processed.

Claims 33, 43 and 49 are in parallel with claim 23 and are rejected for at least the same reasons.

Allowable Subject Matter

Claims 24-32,34-42 and 44-48 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

Examiners note: Examiner has cited particular columns and line numbers in the references as applied to the claims above for the convenience of the applicant. Although the specified citations are representative of the teachings of the art and are applied to the specific limitations within the individual claim, other passages and figures may apply as well. It is respectfully requested from the applicant in preparing responses, to fully consider the references in entirety as potentially teaching all or part of the claimed invention, as well as the context of the passage as taught by the prior art or disclosed by the examiner.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to John M Winter whose telephone number is (703) 305-3971. The examiner can normally be reached on M-F 8:30-6, 1st Fridays off.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, James P Trammell can be reached on (703)305-9768.
